

Risk Control

PrepWise Pulse Surveys™

Do you know what your employees really think?

Employee feedback can help companies strengthen their environmental, health and safety programs. CNA's PrepWise Pulse Survey is a tool available for policyholders to solicit anonymous feedback on their corporate safety culture, management support and accountability, orientation and training, and workplace environment. The results can illustrate how employees and teams view your organization, highlight areas of strength and provide insight into opportunities for improvement.

Anonymous and Online

PrepWise Pulse Surveys™ are easy to administer and can be completed online by employees around the globe, whether they're at work or at home. All responses are anonymous. Results can be analyzed between specific groups within the organization and summarized into actionable results.

Measurable Results

Survey results are shared with the customer, highlighting positive feedback as well as areas for improvement. Scores also show key findings by job category and tenure.

Customizable

Survey questions are customizable, allowing you to focus on key areas such as:

- Overall perception
- Management support and accountability
- Employee involvement
- Hiring, orientation and training
- Hazard recognition, evaluation and control
- Work environment
- Policyholder questions
